

Did you know?

We have raised \$13,627 towards our new playground project.

The new playground will cost approximately \$100,000.

Here is a breakdown of where we'll be spending the money...

- * To remove the existing structure will cost around \$10,000
- * New rubber surface is \$17 per square foot and we need 2,200 square feet in the existing space totaling \$37,400
 - * If we add a swing bay that adds 1,120 square feet for an additional \$19,040
 - * An average freestanding spiral slide costs \$5,000
 - * A bay of swings cost \$3,800
 - * A freestanding summit climber costs \$4,600
 - * Other misc. climbing features and structures cost \$5,000 as a base to build off of
 - * A few free standing objects/musical items are \$5,000
- * Installation is \$22,000 and freight can cost an additional \$1,500

All of these prices are estimates and the final design of the space has not been decided. This is a general idea of what has been suggested and what it would cost to do.

Help us make this a reality for our students and church community!
